

FUELING A CYCLOCROSS RACE

 THIS NUTRITION PLAN IS BASED ON A **1H RACE**

RACE DAY -1^d

500g to 600g carbs

Min. 2 Liter fluids

Include a (low-fiber) carb source such as cereal, bread, pasta, rice... with every meal. Incorporate 3 high carb snacks in your meal plan such as the **6d ENERGY CAKE***. Hydrate with drinks that provide both carbohydrates and electrolytes such as the **6d ENERGY SPORTS DRINK**.

PRE-RACE MEAL -3^H

150g to 200g carbs

500-750 ml fluids

Stick to foods you are used to eat. Focus on (low-fiber) high carb foods such as cereal, bread, jam, pancakes, pasta, rice... Incorporate liquid carbohydrates such as the **6d ENERGY SPORTS DRINK** when you have difficulties eating enough carbohydrates. Take one **6d NITRATE SHOT** immediately after this meal.

TRAIN THE GUT !

Never try a new nutrition plan for the first time during your race! In the final weeks leading up to the race, pick one longer training session per week, and practice your race nutrition plan to make sure your stomach and intestines are accustomed to your race day nutrition plan!

(*= Apart from the suggested product, you are free to replace this product with another high carb snack such as the 6d Energy Fruit, 6d Energy Nougat or other products from the 6d bars & bites range)

(**= If you prefer not to use caffeine, you can use the regular 6d Isogel.)

There are multiple ways to fuel your cyclocross race, this is just one example. Contact info@6dsportsnutrition.com for additional questions.
